

Stop The First Cold.
A cold does not get well of itself. The process of wearing out a cold wears you out, and your cough becomes serious if neglected. Hacking coughs drain the energy and sap the vitality. For 47 years the happy combination of soothing antiseptic balsams in Dr. King's New Discovery has healed coughs and relieved congestion. Young and old can testify to the effectiveness of Dr. King's New Discovery for coughs and colds. Buy a bottle to-day at your Druggist, 50c.

Miss Dora Peacock of Higginsville arrived Tuesday for a visit here with friends.
Dr. J. C. Snyder went to Wellington Tuesday to spend the day on professional business.

Don't Neglect Your Cold.
Neglected colds get worse, instead of better. A stuffed head, a tight chest must be relieved at once. Dr. Bell's Pine-Tar-Honey is nature's remedy. Honey and glycerine heal the irritated membrane, antiseptic tar loosens the phlegm, you breathe easier and your cold is broken up. Pleasant to take, Dr. Bell's Pine-Tar-Honey is an ideal remedy for children as well as grown-ups. At your druggist, 25c.

W. M. Dewees of Trenton, Mo., a former resident of this city, spent Monday here on business.
Rev. S. O. Hall went to Higginsville Tuesday on church business.
E. B. Vaughan went to Kansas City Tuesday to spend the day on business.

Clear Bad Skin From Within.
Pimples, muddy complexions are due to impurities in the blood. Clear up the skin by taking Dr. King's New Life Pills. Their mild laxative qualities remove the poisons from the system and brighten the eye. A full, free, non-gripping bowel movement in the morning is the reward of a dose of Dr. King's New Life Pills the night before. At your Druggist, 25c.

Judge T. A. Walker went to Aullville Tuesday to spend the day on business.
James A. Rankin went to Marshall Tuesday to spend the day on business.
Capt. Oscar Gates went to Kansas City Tuesday morning to spend the day.

Forget Your Aches.
Stiff knees, aching limbs, lame back make life a burden. If you suffer from rheumatism, gout, lumbago, neuralgia, get a bottle of Sloan's Liniment, the universal remedy for pain. Easy to apply; it penetrates without rubbing and soothes the tender flesh. Cleaner and more effective than musky ointments or poultices. For strains or sprains, sore muscles or wrenched ligaments resulting from strenuous exercise, Sloan's Liniment gives quick relief. Keep it on hand for emergencies. At your Druggist, 25c.

Mrs. Percy Silver and daughter, Mary Ellen, went to Kansas City Tuesday for a visit.

BIG TRACTOR SHOW AT MISSOURI STATE FAIR

Typical Missouri Field Will Be Scene of Practical Demonstration.

Many farmers have an idea that the only use for the tractor is to pull gang plows and harrows across the field, but this is but a small part of the utility of these machines. Those who have made a study of these machines have devised a great many other ways in which they can be used on the average sized farm.

At the Missouri State Fair this year all of the ways will be demonstrated on a 100 acre field just west of the Fair Grounds. Here tractors, both large and small, will be shown to prospective customers and those who want to see just what these much talked of machines can do.

This hundred acre field will be taken just as it was after the last crop was harvested. The tractor will haul the manure spreader, showing the time that it takes to prepare a field of this kind according to the latest methods. The next day the ground will be plowed. A gang plow that will make eleven furrows will be one of the features of this demonstration. Later the ground will be harrowed and pulverized. Then the ground will be drilled. All of these operations will be done just as it would be on the ordinary Missouri farm.

Other interesting features that will be part of the demonstration will be pulley and belt work, showing how these engines can be attached to almost anything that goes 'round. There will also be a demonstration of road work which will show how the farmer can utilize his machine by hauling his crop to market with it.

On the fair grounds there will be a big display of all kinds of farm machinery that is used from the time that the ground is prepared for the seed to the time that the crop is ready for storage. Lime pulverers, manure spreaders, plows, harrows, drills, reapers, binders, threshing machines, ensilage cutters and fillers, clover hullers, hay balers and leaders, in fact all of the machinery that can be used on the farm, will be on display and in motion.

For one who intends to purchase any kind of farm implements, no better place can be found to look over an extensive line in all kinds of farm machinery than the Missouri State Fair, September 23 to 30.

Efficiency in Household Work.

To enable women to gain more efficiency in their everyday housework is the object of the short course for women given by the College of Agriculture of the University of Missouri. This course begins November 1, 1916, and ends December 21, 1916. It is open to women more than 16 years old.

Courses are given in cooking, sewing, canning, home care of the sick, preventive medicine, house decoration, home gardening, farm dairying and poultry raising. In addition, practically all the work offered in the two year winter course for men, which is in session during the time of the women's course, is open to women.

For information regarding the courses, write to Superintendent of Short Courses, University of Missouri, Columbia, Mo.

CASTORIA

For Infants and Children
In Use For Over 30 Years
Always bears the Signature of *Dr. J. C. Watson*

Rev. T. M. Cobb and Rev. F. M. Burton went to Independence Tuesday on church business.

The World's Most Quiet Motor

It's easy to pick the real thing in motor cars. Drive a Willys-Knight and you'll know—it makes everything else seem like a makeshift. Willys-Knight power is revealed in motion only.

Otherwise it escapes your senses. That quiet, smooth softness also means absence of wear—it's supreme when new—gets better with age—practically everlasting.

Willys-Knight owners are all through experimenting—they're fixed and know it. Settle your motor car problem for good—today with a Willys-Knight—the world's most quiet motor.

H. E. NEESE, Wellington, Mo.

Select Seed Corn Now.

One of the most profitable things a farmers' club can do at this time of the year, according to W. H. Baker of the College of Agriculture of the University of Missouri, is to provide a supply of reliable seed corn for next year's planting. Most of the supply may usually be secured by intelligent field selection from the best fields in the community before the time of the early freezes, says Mr. Baker. As soon as selected the corn should be stored in racks in such a way as to secure rapid and thorough drying.

Experimental work along this line shows that the yield of corn may be increased 5 to 10 per cent by early field selection and careful storage of the seed as compared with the ordinary method of crib selection in the spring. Twenty-five growers constituting a farmers' club in any good corn section of Missouri may easily raise a fifty thousand bushel corn crop under average conditions. A 5 per cent increase of this crop would be worth at least fifteen hundred dollars or sixty dollars per man. The extra labor required for early field selection and proper storage would not exceed two days per man.

"Why not have a seed corn day devoted to the selection, and careful storage of next year's seed corn?" asks Mr. Baker. Every one who knows how should help. The boys could be taught the art of field selection and methods of storage and have the importance of good seed impressed upon their minds. The College of Agriculture will send instructions for field selection and storage of seed corn upon request.

Louis Gruber went to Sedalia Friday for several days on business.

F. G. Hord went to Aullville Friday to spend the day on business.

Gladys Grieser went to Kansas City Friday for an extended visit.

W. H. Chiles went to Kansas City Friday to spend the day on business.

S. N. Wilson went to Kansas City Friday to spend the day on business.

Miss Nome West, who has been visiting Miss Vera May Campbell in this city returned to her home in Kansas City Friday morning.

Does a Hen Get Too Fat To Lay?

The question, "Does a hen get too fat to lay?" is often asked and naturally this question is associated with feed and feeding.

After observing many experiments here at the Experiment station, we are led to believe that this question should be reversed and instead of saying the hen gets too fat to lay, we should say the hen can't lay is the reason she gets too fat.

If a hen is fed a ration which makes ten yolks for each five whites, she will make only five eggs and the other five yolks are taken back into the hen's system and built into fat. In this way she becomes very fat, yet produces only a few eggs. In this case the hen is not at fault, for if she had been given a balanced ration, she would have manufactured eggs instead of fat.

A good example of a mistake of this kind is permitting hens to eat with fattening hogs. We often hear farmers say that the hens eat with the fattening hogs and waste the feed. They are right so far as egg production is concerned, for a ration which is good for fattening hogs is not good for laying hens. The reason is that the ration produces more yolks than whites and therefore the hens get fat instead of producing eggs.

If the hens have range and access to the hog feed, the better plan is to furnish meat food of some kind which is heavier in the production of whites. In this way, the hens eat less of the hog feed, yet produce more eggs.

During late fall and winter the hens' meat supply is cut off for during the summer they have a supply of worms, bugs, grasshoppers, etc., but frosts and cold weather destroy this supply. It is a mistake not to correct this condition for most grains fed to hens are stronger in the production of yolks than in the production of whites. Meats of all kinds, skimmed milk etc., are stronger in the production of whites than yolks, and would therefore be good to feed in connection with grain to form a balanced ration.

About the only solution for this problem where hens have free range and access to grain is to place the meats, milk, etc., where the hens can get it and let them balance their own ration, which they do very well

where they have an opportunity, but if they are allowed to eat all the grain they want, such as corn, they will get fat and lay only a few eggs, yet should be held blameless for the condition.

Healthy Hogs Resist Cholera.

Hogs are not as resistant to disease at this season of the year as they are in the spring when getting an abundance of green forage, and having access to wide range. It is necessary, therefore, to give them more attention and better care to offset seasonal conditions and danger from new corn.

Do not feed in the same lot, or on the same acre of ground, day after day. This contaminates the feeding places, and also attracts crows, pigeons, and sparrows which may have been feeding with a cholera infected herd. Throw the feed out in a different spot each day, thus giving the pigs a clean "plate" from which to eat.

The water supply is of much importance to the health of the hogs at this time of year. Old mud wallows are never good, but are not so bad if the hogs can have pure water to drink, but if forced to bathe and drink in the same "tub" serious trouble can be expected at any time. See that they have an abundance of pure water to drink, situated near the wallow holes or feeding places. Pure water

The Old Men's Club.

The Old Men's Club of Lafayette County will hold its annual meeting at Dover on Saturday, September 23, 1916. This will be the forty-eighth annual meeting, the club having been organized August 4th, 1868.

Three members have died since the June meeting, as follows: Joseph A. Christy, (Vice-president), Rev. W. B. Cobb and T. A. Murray.

Five committees will report memorials, as follows:

On the death of E. D. Emerson—C. J. Lewis and James M. Winn.

On the death of H. H. Hughes—J. E. Rigg and J. B. Santmeyer.

On the death of Lemuel W. Phillips—Charles A. Graham.

On the death of Capt. W. A. Redd—R. P. Harwood and Wilson Malone.

On the death of Charles L. Simpson—W. L. Smith and T. T. Puckett.

These memorials should be prepared at once and mailed to Frank Bowman, secretary, at Lexington.

Officers for the ensuing year will be elected at this meeting.

Thomas M. Cobb, Pres.
Frank Bowman, Sec.

will aid materially in keeping the herd cholera free. E. R. Spence, U. of M. College of Agriculture.

Women's Troubles

"My troubles are all gone," says Mrs. Cora E. Armistead, of Stanton, Mo., "since taking Cardui, the woman's tonic. I suffered with a throbbing pain in my right side for several months, cold chills would crawl all over me, and I would get so weak, that I would have to lie down. The very first bottle of Cardui made me feel much better. I have also given Cardui to my daughters and it helped them. I have used

CARD-UI

The Woman's Tonic

in my home, when needed, for 13 years, and it's the best doctor I can get for womanly ailments." Begin today to take Cardui yourself, give it to your daughters, if you have any, and recommend it to your lady friends. Cardui has helped more than a million weak women in the past 50 years. It has benefited ailments ranging from serious womanly troubles to tired-out, nervous, run-down constitutions. Your druggist sells Cardui. Get a bottle today.

It Always Helps
